PROCEDURE UPDATE

Carbon Filter Reset.

Updated reset procedure — no more daily codes from AMT Support. Each carbon filter now ships with its own 12-character reset code, entered directly on the machine.

BEFORE

Daily reset code from Support

A daily reset code from AMT Support was required for every carbon filter reset — one support call per reset.

→

NOW

Code ships with the filter

Each carbon filter arrives with its own 12-character code. Enter it directly on the machine — no support call needed.

`XXXXXXXXXXXX`

HOW THE NEW RESET WORKS

Replace · Reset · Enter Code.

1

Replace the carbon filter

Install the new carbon filter as usual.

→

2

Press RESET on screen

Under `Consumables → Carbon Filter`*, tap the* `RESET` *button.*

→

3

Enter the 12-character code

Type the code printed on the new filter into the on-screen keyboard, then press `enter`*.*

MACHINE SCREEN *The 12-character code is entered when the reset is triggered from the touchscreen.*

WHERE TO FIND THE CODE

Printed on each carbon filter

*The code is printed on the filter when it ships — **no need to call AMT Support** for daily codes anymore.*

SF GEN 2 USERS

Nothing new to learn

You already use this procedure on your SF Gen 2 machines — the same workflow is now available across the fleet.
